One-Size-Doesn't-Fit-All: Differentiated Engagement Pathways for Transfer Student Success - Appendices

Rebecca Croxton
University of North Carolina at Charlotte, USA

Anne Cooper Moore
University of North Carolina at Charlotte, USA

Table of Appendices

Appendix A. Dataset Subgroupings Frequencies & Percent Totals

Subcategorical groupings were created within each dataset to help control for admission status, the number of incoming credits, 1st Generation status, transfer institution type, and whether a transfer student's transferring institution was in-state or out-of-state,

Appendix A.Table 1. Data Subsets, Subgroupings, and Frequencies & Percent Totals

| | Data Subset | | | | | | | |
| | Year 1 to Year 2 Retention Analysis Dataset (N=55,311) | | | 4 Year Cumulative GPA Dataset (N=37,236) | | | 6 Year Graduation Rates Dataset (N=24,404) | |
Subgroup	N	% of Total		N	% of Total		N	% of Total
Admission Status, Incoming Credits, and 1st Generation Status								
FTIC Freshmen: any # credits 1st Gen	7,471	19.4		4,080	19.4		2,002	19.8
FTIC Freshmen: any # credits Not 1st Gen	15,383	39.8		7,801	37.0		3,683	36.4
Transfers: 24-39 credits 1st Gen	2,090	5.4		1,295	6.1		633	6.3
Transfers: 24-39 credits Not 1st Gen	2,567	6.6		1,464	6.9		654	6.5
Transfers: 40-59 credits 1st Gen	2,149	5.6		1,299	6.2		623	6.2
Transfers: 40-59 credits Not 1st Gen	2,350	6.1		1,321	6.3		621	6.1
Transfers: 60+ credits 1st Gen	3,394	8.8		2,020	9.6		1,016	10.1
Transfers: 60+ credits Not 1st Gen.	3,199	8.3		1,800	8.5		876	8.7
Total	38,603	100.0		21,080	100.0		10,108	100.0
Transfer Students, Incoming Credits, & Transfer Institution Type								
Transfers: 24-39 credits 4YR+	2,641	11.3		1,917	12.3		1,277	12.7
Transfers: 24-39 credits 2YRorLess	3,911	16.8		2,532	16.2		1,515	15.1
Transfers: 40-59 credits 4YR+	2,048	8.8		1,406	9.0		944	9.4
Transfers: 40-59 credits 2YRorLess	4,294	18.4		2,759	17.6		1,695	16.9

Appendix G. RQ3: Delineated Engagement Pathways for Success

G.1. Retention to 2nd Year

The tables below outline pathways for 1st year co-curricular and extracurricular engagement activities that significantly increase the odds that students in each population subgroup will be retained for a second year of study..

To interpret the findings in each table, read …

> For each [*engagement activity*] a student in a [*specific population subgroup*] participated in during their first year of study, the odds they would be retained for a second year increased [*x times*].

> Example: For each *library instruction session* a *Transfer Student with 60+ incoming credits who was 1st generation*, participated in during their first year of study, the odds they would be retained for a second year increased **1.562 times**.
